Professional Summary

Aspiring AI Engineer pursuing a Master's in Computer Applications with a specialization in Generative AI. Hands-on experience building AI-powered applications using Python, FastAPI, Flask, and cloud technologies. Skilled in LLM integration, Generative AI, API development, and intelligent automation using OpenAI GPT, Google Gemini, Claude, and LangChain

Education

SRM University

Master's of Computer Applications(Generative AI)

July. 2025 – May 2027

Chennai, TamilNadu

Presidency University

Bachelor's of Computer Applications

Sept. 2022 – June 2025

Bangalore, Karnataka

Relevant Coursework

- Agents & Agentic Systems
- Artificial Intelligence
- Cloud Service Management
- Prompt Engineering
- Chatbot Development
- API Development & Integration

Projects

1) AI-based Job Scraper | *Python, SQLite, Web Scraping*

April 2026

Built an AI-powered job aggregation system to collect fresher-level Data Science, Machine Learning, and AI job postings from LinkedIn and Naukri.

Implemented LLM-based filtering to identify jobs posted within the last 24 hours and match relevant skills and experience.

Integrated a Telegram bot to automatically deliver the top 9 curated job postings daily at 6:00 PM IST.

2) Thero - Mental Health Chatbot | *Python, Flask, LangChain*

April 2025

Designed and developed an AI-based mental health chatbot to provide supportive responses and guide users toward positive decision-making.

Focused on ethical AI practices by avoiding harmful suggestions and promoting mental well-being through guided conversations.

3) YouTube Video Downloader | *Python, yt-dlp, Web Design*

May 2024

Developed a Python-based application to download YouTube videos in the highest available resolution.

Applied exception handling to improve reliability while strengthening Python scripting and automation skills.

Technical Skills

Languages: Python, SQL, JavaScript, HTML/CSS

AI and Automation : OpenAI GPT, Google Gemini, Claude, LangChain, LangGraph, MCP (Model Context Protocol), Prompt Engineering, AI Agents

Developer Tools: VS Code, Eclipse, AWS , Android Studio, Antigravity

Technologies/Frameworks: Linux, Postgres SQL, My SQL, MongoDB, Git and GitHub, FastAPI, Scikit-Learn

Publication

Thero: Personal Mental Health Chat Bot

May 2025
