Education

SRM University

Master's of Computer Applications(Generative AI)

July. 2025 – May 2027

Chennai, TamilNadu

Presidency University

Bachelor's of Computer Applications

Sept. 2022 – June 2025

Bangalore, Karnataka

Accord School

PUC (PCB)

June 2020 – May 2022

Tirupati, AndhraPradesh

Relevant Coursework

- Data Structures
- Database Management
- Artificial Intelligence
- Operating Systems

Projects

1) AI based Job Scraper | *Python, SQLite, WebScraping*

April 2026

- Built an automated AI-powered job aggregation system to collect fresher-level Data Science, Machine Learning, and AI job postings from platforms like LinkedIn and Naukri.
- Implemented intelligent filtering using LLM integration to identify jobs posted within the last 24 hours and match relevant skills and experience criteria.
- Designed a structured pipeline with web scraping, data storage (SQLite), and deduplication to ensure accurate and up-to-date job listings.
- Developed a Telegram bot integration to automatically deliver the top 9 curated job postings daily at 6:00 PM IST.

2 Thero - Mental Health ChatBot | *Python, Flask, Langchain*

April 2025

- Designed and developed an AI-based mental health chatbot to provide supportive responses and guide users toward positive decision-making.
- Implemented Natural Language Processing (NLP) techniques to understand user inputs and generate appropriate responses
- Focused on ethical AI usage by avoiding harmful suggestions and promoting mental well-being through guided conversations.

3) Youtube Video Downloader | *Python, Ytdlp, Web Design*

May 2024

- Developed a Python-based application to download videos from YouTube in better available resolution.
- Implemented functionality to handle user input, validate URLs, and manage file downloads efficiently.
- Applied exception handling to manage errors and had a good understanding of Python scripting and automation

Technical Skills

Languages: Python, Java, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Eclipse, AWS , Android Studio, Antigravity

Technologies/Frameworks: Linux, Git and GitHub, FastAPI, Scikit-Learn, pytorch

Publication

Thero: Personal Mental Health Chat Bot
