Professional Summary

MCA student specializing in Generative AI and Data Science with strong skills in Python, SQL, and machine learning fundamentals. Experienced in building AI-powered chatbots using LLMs, with practical exposure to data analysis, model evaluation, Git/GitHub, and AWS fundamentals. Highly motivated to begin a career in AI, Data Science, or Machine Learning within a technology-driven organization.

Skills

Python | SQL | Git and GitHub | AWS | HTML | CSS | API | Data Analysis |

Projects

Mental Health Chat-Bot(Thero) : <https://github.com/JAGANNATH2004/Mental-health-chatbot-Thero->

- Designed and developed an AI-based mental health chatbot to provide supportive responses and guide users toward positive decision-making.
- Implemented Natural Language Processing (NLP) techniques to understand user inputs and generate appropriate responses.
- Focused on ethical AI usage by avoiding harmful suggestions and promoting mental well-being through guided conversations.

Youtube Video Downloader :

- Developed a Python-based application to download videos from YouTube in better available resolution.
 - Implemented functionality to handle user input, validate URLs, and manage file downloads efficiently.
 - Applied exception handling to manage errors and had a good understanding of Python scripting and automation
-

Certifications

- Databases and SQL for Data Science with Python - IBM
 - Python for Data Science, AI & Development - IBM
 - python(basic) - Hackerrank
 - AWS Academy Graduate - AWS Academy Cloud Foundations – AWS
-
